

AUS920010628US1

The listing of claims will replace all prior versions, and listing, of claims in the application:

1. (Currently Amended) A method of online shopping comprising the steps of:  
  
purchasing an electronic item from a merchant web site,  
  
wherein the purchasing is carried out by use of a client shopping cart that collects item information from the merchant web site prior to checkout,  
  
wherein the client shopping cart further comprises a merchandise pickup facility installed on a client, and  
  
wherein the client is coupled for data communications to the merchant web site;  
  
downloading, to the client, the electronic item through the merchandise pickup facility on the client; and  
  
installing the electronic item through the merchandise pickup facility on the client.
2. (Original) The method of claim 1 wherein the merchandise pickup facility comprises application software integrated within the client shopping cart.
3. (Original) The method of claim 1 wherein the merchandise pickup facility comprises a data communications software application installed upon the client and connected to the client shopping cart through an interface.

AUS920010628US1

4. (Original) The method of claim 1 wherein the merchandise pickup facility comprises software integrated within the client as a plug-in wherein the merchandise pickup facility is connected to the client shopping cart through an interface.
5. (Original) The method of claim 1 wherein downloading the electronic item comprises downloading the electronic item to the client through a service provider site upon which is installed a remote merchandise pickup facility.
6. (Original) The method of claim 1 further comprising scheduling the downloading.
7. (Original) The method of claim 1 wherein the downloading is performed in accordance with a predefined schedule, wherein the schedule is stored in computer memory on the client.
8. (Original) The method of claim 7 wherein the client has a temporary web address.
9. (Original) The method of claim 7 wherein the client has a permanent web address.
10. (Original) The method of claim 1 wherein the downloading is performed in accordance with a predefined schedule, wherein the schedule is stored in computer memory on the merchant web site.
11. (Original) The method of claim 10 wherein the client has a permanent web address.
12. (Currently Amended) A system of online shopping comprising:  
  
means for purchasing an electronic item from a merchant web site,

AUS920010628US1

wherein the means for purchasing comprises a client shopping cart that collects item information from the merchant web site prior to checkout,

wherein the client shopping cart further comprises a merchandise pickup facility installed on a client, and

wherein the client is coupled for data communications to the merchant web site;

means for downloading, to the client, the electronic item through the merchandise pickup facility on the client; and

means for installing the electronic item through the merchandise pickup facility on the client.

13. (Original) The system of claim 12 wherein the merchandise pickup facility comprises application software integrated within the client shopping cart.
14. (Original) The system of claim 12 wherein the merchandise pickup facility comprises a data communications software application installed upon the client and connected to the client shopping cart through an interface.
15. (Original) The system of claim 12 wherein the merchandise pickup facility comprises software integrated within the client as a plug-in wherein the merchandise pickup facility is connected to the client shopping cart through an interface.
16. (Original) The system of claim 12 wherein means for downloading the electronic item comprises means for downloading the electronic item to the client through a service provider site upon which is installed a remote merchandise pickup facility.

AUS920010628US1

17. (Original) The system of claim 12 further comprising means for scheduling the downloading.
18. (Original) The system of claim 12 wherein the means for downloading is operating in accordance with a predefined schedule, wherein the schedule is stored in computer memory on the client.
19. (Original) The system of claim 18 wherein the client has a temporary web address.
20. (Original) The system of claim 18 wherein the client has a permanent web address.
21. (Original) The system of claim 12 wherein the means for downloading is operating in accordance with a predefined schedule, wherein the schedule is stored in computer memory on the merchant web site.
22. (Original) The system of claim 21 wherein the client has a permanent web address.
23. (Currently Amended) A computer program product of online shopping comprising:

a recording medium;

means, recorded on the recording medium, for purchasing an electronic item from a merchant web site,

wherein the means, recorded on the recording medium, for purchasing comprises a client shopping cart that collects item information from the merchant web site prior to checkout,

AUS920010628US1

wherein the client shopping cart further comprises a merchandise pickup facility installed on a client, and

wherein the client is coupled for data communications to the merchant web site;

means, recorded on the recording medium, for downloading, to the client, the electronic item through the merchandise pickup facility on the client; and

means, recorded on the recording medium, for installing the electronic item through the merchandise pickup facility on the client.

24. (Original) The computer program product of claim 23 wherein the merchandise pickup facility comprises application software integrated within the client shopping cart.
25. (Original) The computer program product of claim 23 wherein the merchandise pickup facility comprises a data communications software application installed upon the client and connected to the client shopping cart through an interface.
26. (Original) The computer program product of claim 23 wherein the merchandise pickup facility comprises software integrated within the client as a plug-in wherein the merchandise pickup facility is connected to the client shopping cart through an interface.
27. (Original) The computer program product of claim 23 wherein means, recorded on the recording medium, for downloading the electronic item comprises means, recorded on the recording medium, for downloading the electronic item to the client through a service provider site upon which is installed a remote merchandise pickup facility.

AUS920010628US1

28. (Original) The computer program product of claim 23 further comprising means, recorded on the recording medium, for scheduling the downloading.
29. (Original) The computer program product of claim 23 wherein the means, recorded on the recording medium, for downloading is operating in accordance with a predefined schedule, wherein the schedule is stored in computer memory on the client.
30. (Original) The computer program product of claim 29 wherein the client has a temporary web address.
31. (Original) The computer program product of claim 29 wherein the client has a permanent web address.
32. (Original) The computer program product of claim 23 wherein the means, recorded on the recording medium, for downloading is operating in accordance with a predefined schedule, wherein the schedule is stored in computer memory on the merchant web site.
33. (Original) The computer program product of claim 32 wherein the client has a permanent web address.
34. (New) The method of claim 1 wherein the client shopping cart contains item information for another electronic item from another website.
35. (New) The method of claim 1 further comprising exposing item information for another electronic item from another website to the merchant web site.
